MUHAMMAD RAHMATULLAH, M.B.A.

Jakarta, Indonesia, 11470 · +6289501289411 · hei.rahmatullah@gmail.com · Linkedin · Github · Website

Technical Skills

Ruby, Ruby on Rails, Elixir, Phoenix, JavaScript, Node.js, React.js, SQL, NoSQL, Amazon Web Service API, Google API, RabbitMQ, Apache Kafka, Redis, MySQL, PostgreSQL, MongoDB, Heroku, Git, Docker, CI/CD, New Relic, DataDog, Bash.

Professional Experiences

Kredivo, Jakarta, Full-time — Dec 2023 – Present

Senior Software Engineer

- Led the end-to-end integration of BCA Digital (BCAD) as a new lending partner, enabling a financing channel projected to contribute up to ~IDR **1T** annually and contribute up to IDR **300B** in annual gross profit.
- Led the optimization of the Data Ingestion process, reducing execution time from **10 minutes** to **20 seconds**.
- Optimized the Kredivo Internal Tool's build time and Bitbucket pipeline by reducing the build size by up to **50%** and improving pipeline speed from **30 minutes to 15 minutes**.
- Developed and maintained internal tools to manage loan disbursement, repayment, and cancellation using **Node.js**, **React.js,** and **MySQL**
- Awared
- Mentored new engineer through a structured 90-day onboarding program, accelerating ramp-up by providing domain knowledge, technical guidance, and cross-functional collaboration support.
- Awarded the Engineering Excellence Award at Kredivo for consistently delivering high-quality engineering work

Stockbit, Jakarta, Full-time — Dec 2021 – Dec 2023

Senior Software Engineer

- Led the team & developed an invitation code service to handle the first **1000** users of crypto.stockbit.com using **AWS EB**, **Elixir**, **Phoenix**, **Docker,** and **PostgreSQL**.
- Developed a real-time crypto market data aggregator and streaming service for crypto.stockbit.com using **AWS EB**, **AWS RDS**, **Kafka**, **ZeroMQ**, **Elixir**, **Phoenix**, **Redis**, **Docker,** and **PostgreSQL Time Series Database** that can process **1 million** monthly trade data.
- Responsible for the creation of **RFC** and **Technical Documentation,** consisting of API contracts and High-level diagrams.
- Implemented **GitLab continuous integration** pipeline for all services to automate the test, audit, and build the application **Docker** image.

Mekari, Jakarta, Full-time — June 2020 – Dec 2021

Software Engineer 2

- Develop **11** Microservices to integrate with various bank partner's APIs and various merchant's APIs for jurnal.id using **AWS RDS**, **AWS EB**, **AWS Lambda**, **Docker**, **Jenkins**, **Ruby**, **Ruby on Rails**, **MySQL**, **MongoDB**, **Redis**, **RabbitMQ**, and **Java**.
- Developed internal system management and monitoring tools that reduced customer issues by **80%** using **AWS RDS**, **AWS EB**, **Ruby**, **Ruby On Rails**, **JavaScript**, **Docker**, and **Vue.js.**
- Participated and created an **e-signature** Application using **Ruby** and **Ruby on Rails** in the internal hackathon and won **third place**. (link)

Clapping Ape, Bandung, Full-time — July 2019 – Mar 2020

Backend Engineer

- Developed a **Microservices** Service and maintained the website of one of the largest assurance providers in Indonesia jagadiri.co.id, using **Heroku**, **AWS EC2**, **AWS S3**, **AWS RDS**, **Ruby**, **Ruby on Rails**, **MySQL**, **Redis**, and **JavaScript**.

- Singlehandedly designed and developed numerous applications using **Ruby**, **Ruby On Rails**, and **PHP**, which resulted in improved general performance.

41 Studio, Bandung, Full-time — Jun 2017 – July 2019

Ruby on Rails Engineer

- Refactored the software structure for an online video service backend API, reducing overhead costs by 50% using **Facebook Graph API**, **Google OAuth API**, **MixPanel**, **Heroku**, **AWS EC2**, **AWS S3**, **AWS SNS**, **AWS RDS**, **AWS Elastic Transcoder**, **Firebase Cloud Messaging**, **Ruby**, **Ruby on Rails**, **Redis**, and **MySQL**.
- Successfully developed numerous software applications that increased user-friendliness by 20% using **Ruby**, **Ruby on Rails**, **MySQL**, and **JavaScript**.

Public Speaking & Mentoring Experiences

Participated as a guest speaker to represent Kredivo at **upnvj.ac.id** and talk about "**Big Data, Smart Solutions: AI Engineers as Digital Innovation Architects**". (link) — 2025

Participated as a speaker in Internal Stockbit engineering talks about "**Man In the Middle: Mitigation, and Prevention**". (link) — 2023

Participated as a guest speaker to represent Stockbit at **dibimbing.id** and talk about "**MySQL and Database**". (link) 2023

Participated as a guest speaker to represent Stockbit at **exabytes.co.id** and talk about "**Implementation of Coding Principles**". (link) 2023

Participated as a guest speaker to represent the Mekari at **exabytes.co.id** and talk about "**Build your First RESTful JSON API With Rails and Deploy it to Heroku**" (link) 2022

Volunteered as an Industrial Trainer and Software Engineer Mentor at **Glints** as one of the Ministry of Education of Indonesia program and mentored **30** mentees. (link) 2021

Open Source Experiences

ifme - Open source mental health communication web app to share experiences with loved ones

EBWiki - Repository of police abuse cases against people of color

twirp-elixir - Elixir implementation of the twirp RPC framework

Educations

Bandung Institute of Technology, Bandung, Indonesia 2022-2024
Master of Business Administration

Widyatama University, Bandung, Indonesia 2017-2021
Bachelor of Information Systems - Cumlaude
